Find customers who never order

We have two tables, Customer and orders. The customer table contains customer information with id and name columns. The Orders table contains order information with the id and customerid columns, where customerid refers to the id column in the customers table. Find Customers who never place an order.

Customers:
```
+----+-------+
| id | name  |
+----+-------+
| 1 | Joe   |
| 2 | Henry |
| 3 | Sam   |
| 4 | Max   |
+----+-------+
```

Orders:
```
+----+------------+
| id | customerId |
+----+------------+
| 2 |        1 |
| 1 |        3 |
+----+------------+
```

SELECT customers.id, customers.name

FROM customers

LEFT JOIN orders ON customers.id = orders.id

WHERE orders.id IS NULL;
